CTMS-616RKPS Series Rack Mountable 6x16 Multiswitches

Features:

- 6 Inputs to support DIRECTV Ka/Ku satellite positions 99°,101°,103°,110°, 119°, 72.5° & 95°
- 16 Independent outputs
- 19" Rack mountable
- Occupies 2 rack spaces (3.5")
- Available with or without integrated B-Band technology

Contents Include:

- 1 CTMS-616RKPS or 1 CTMS-616RKPS B-BAND
- 1 Power supply

Description:

The CTMS-616RKPS series of 6 input, 16 output satellite multiswitches are primarily designed to provide signal to up to 16 satellite tuners from DIRECTV 99°,101°,103°,110°,119°,72.5° and 95° satellite positions. Both models are housed in a 19" rack mountable chassis with all of the input, output and power connections located on the rear of the unit making them perfect for use in headend systems and high end residential applications. The standard CTMS-616RKPS model is compatible with all DIRECTV receivers and therefore perfect for applications with a mix of standard definition and high definition receivers. The CTMS-616RKPS B-BAND model has integrated B-Band converter technology. This unit is perfect for applications in which all receivers are HD MPEG-4 and would normally require B-Band converters. This eliminates the need for individual B-Band converters on each receiver

Specifications:

Frequency Range:	150 - 2,150 MHz	Tuner Output Connections:	F Female
Number Of Satellite Inputs:	6	Power Supply Connection:	F Female
Number Of Tuner Outputs:	16	Power Supply:	Included
Satellite Compatibility:	DIRECTV Ka/Ku	Dimensions:	19"W x 3½"H x 10¼"D
Satellite Input Connections:	F Female	Weight:	10 lbs., 11 oz.

Tech Tip:

Since the Ka low band occupies a frequency range from 250-750 MHz, off air antenna and cable signals can not be diplexed through this unit or on the outputs of this unit when it is supplied with signal from a Ka/Ku satellite dish.

Do not put terminators on any unused input or output ports of this switch.

Ordering Information:

CTMS-616RKPS	Rack mountable 6 input, 16 output satellite multiswitch
CTMS-616RKPS B-BAND	Rack mountable 6 input, 16 output satellite multiswitch with integrated B-Band technology
