LSS800A-3-1

This style of Replacement Magnepull Bullet is designed for use on noninsulated wall drops. It is also used in confined spaces where a Leader Magnet is not desired.

LSS800A-4

This style of Replacement Magnepull Bullet is designed for use on any fishing device with a 8/32" thread! Works great with Labor Saving Devices Creep-Zit line of Fishing Rods.

LSS800A-6

The 1/2 inch Leader Drop Magnet is perfect for home theater installers, alarm installers, or any other installer using smaller diameter wires! The 1/2" bullet can be threaded onto any 8/32" thread glow rod such as Labor Saving Devices Creep-Zit or use with the included braided brass leader.

LSS800A-3

The 3/4 inch Leader Drop Magnet is designed for use on insulated wall and non-insulated wall drops wall drops.

Magnespot Reference Point Locator MS800

Attach the reference marker at the desired location. The reference marker may be attached using the insertion pin or the reusable adhesive that is provided in the kit.

In the attic simply move the Reference Point Locator in a sweeping motion close to the assumed position of Reference Marker. When the Reference Point Locator is within 3 to 4 inches of the Reference Marker, the Reference Point Locator will give you an audible and visual indication.
