**Cell Phone Streaming
server built-in for
remote viewing**

The ST-DVR9000S/T4 is the latest DVR from Securitytronix in its line of affordable and high quality H.264 DVRs. This 4 Channel DVR allows real-time recording and playback from up to four cameras, and offers recording quality that is unmatched by any other standalone DVR on the market. The superb picture clarity of the recorded surveillance video is made possible by the next generation of H.264 video codec that offers unsurpassed video quality while taking up little hard drive space. It also supports Internet Explorer for network preview and easy USB backup function. Other features include email notification, ddns, alarm input, alarm relay output, audio recording and more. Newly added cell phone software provides extra remote option to monitor your DVR anywhere anytime. *Supports Iphone, symbian OS, and Windows Based Smart Phone.
